

SC ADAPTER Transparent version

Easy
to install
easy
to find

SENKO's new transparent adapter design offers providers and installers a way to effortlessly locate half-latched or unlatched connectors. The clear adapters allow installers to spot the problem area by sight or by creating a laser light path with a LED. Once the break in the connection is found, workers can quickly reconnect unlatched connectors, restoring connections in a timely manner.

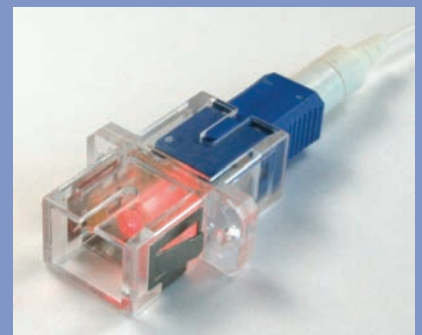

Keeping networks operational is vital to the success of any company. With consumers demanding faster networks, more bandwidth, and unbeatable customer service, it is imperative to keep networks up and running, repairing connections in the system as quickly as possible.

SENKO's transparent adapters are held to the highest standards just as our standard SC adapters and are compliant with Telcordia, ANSI, TIA/EIA, NTT and JIS. Other features of the transparent SC adapters include high precision alignment, low insertion and return loss, and flange options, plus it comes in a compact design.

Features

- ▶ Telcordia, ANSI, TIA/EIA, NTT and JIS compliance
- ▶ High precision alignment
- ▶ Low insertion and return loss and back reflection
- ▶ Compact design
