SMART CHECKER MPO TESTER

MPO Assembly Polarity Test

- 1 Start by removing the protective end cap and clean the port of the tester. DO this for both ports.
- 2 Clean the MPO assembly. This will help extend the life of the tester and avoid accidental cross contamination problems. Do this for both MPO ends.
- 3 Turn the Mode Switch to the left position and the turn on the Power Switch.

TYPICAL PERFORMANCE

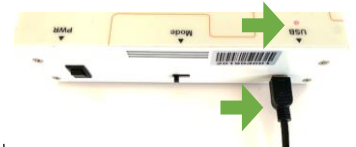

TESTING:

The front panel will show the polarity method and active fibers.

PREVENTIVE MANITENANCE

Returning the protective plugs into the ports when the tester is not in use will help protect the end faces.

CHARGING

The USB indicator light shows red during charging and green when fully charged.
