

MPO+PLUS®

More features than conventional MPO

INDUSTRY'S LOWEST INSERTION LOSS

What is a MPO?

MPO is an industry term to describe a multi-fiber Push On style connector.

By definition, the MPO is a multi-fiber connector (a single connector that houses multiple fiber terminations) that is defined by **IEC-61754-7**, "Fiber optic interconnecting devices and passive components – Fibre optic connector interfaces - Part 7: Type MPO connector family"; and **TIA-604-5-D**, "Fiber Optic Connector Intermateability Standard, Type MPO".

The connector concept was originally designed by NTT Group and finite number of manufacturing licenses were subsequently issued. Senko is among these licensee's. There are several variants of MPO compliant connectors in the markets such as the MTP® connector*.

The MPO's rise in popularity stems from its unique ability to mate multiple fibers (2-72 fibers) within a single connector body housing therefore significantly reducing space. The connector's general design also has unique features from conventional connectors such as being rectangular in shape. It utilizes guide pins and precision holes for ferrule to ferrule alignment within the adaptor as opposed to a precision alignment "sleeve" used in conventional adaptors and the ferrule (MT) is made from a monolithic, high precision glassed filled polymer as opposed to a ceramic material.

Whereas most MPO's supplied in the market today continue from the original design parameters, Senko's MPO Plus Series of enhanced MPO style connectors has taken a leadership role in refining and optimizing the original product in the areas of mechanical durability, product features and most importantly the optical performance of the MT ferrule itself.

*MTP is a registered trademark of US Conec Ltd

Key improvements made in the MPO Plus

Low Insertion Loss Ferrule

- Industry's lowest insertion loss.
- MAX 0.25dB and a typical lower than 0.1dB on both SM Low Loss and MM Low Loss ferrule

Designed to Pass GR 1435

Mechanically stronger, meets and exceeds Telecordia GR-1435

Removable Housing

The removable housing makes it easy to change gender or to clean ferrule

Free Floating Ferrule

A free floating ferrule design to maintain optical connection during mechanical side-pull forces

Advanced Metal Pin

SENKO's stainless steel guide pins are manufactured to the tightest specification, allowing precise alignment of the ferrule

Chamfer Guide Pin

Rounded chamfer on the Guide pin that reduces guide hole chipping thus helping to maintain precise alignment

Improved Spring Design

SENKO's enhanced oval spring provides more ribbon clearance and enhances mechanical performance

Conventional round spring allows less ribbon clearance; limits mechanical performance

Several Boot Options

Boots are available for Ribbon Cable, Ribbon fiber, Round boot and the patent SENKO Flex Angle boot.

2pc Back Post

2pc back post and other enhancement allows easier termination

12 Fiber MM low loss typical IL under 0.1dB

- Exceeds IEC Grade B Random mating

MPO^{PLUS}

Flex Angled Boot

Flex in any direction

- Works with MPO Standard Connector, MPO Premium Mini Connector and Latch Connector

MPO^{PLUS}**Premium Mini Connector**

Simplified Gender and Polarity changes
 Total length 37mm (for 3mm round boot)
 Polarity change without a tool

- HD Push Pull tab ready
- Flex Angle boot ready
- Various boot available

MPO^{PLUS}**Bayonet Connector**

The Smallest Housed MPO connector in the world
 Total length less than 18mm

- Simple Bayonet turn for Engage and Disengage
- Works with all standard MPO hardware

MPO^{PLUS}**Latch Connector**

A new concept MPO with a latch.
 Easy plug-in and plug-out with a single latch.

- Various boot type available
- Flex angel boot ready

MPO^{PLUS}**Micro Latch Connector**

MPO Connection with no housing.
 The smallest footprint you can achieve.

- Insert and removable tool available

MPO^{PLUS}

Polarity Changeable Adapter

Patented one piece design enhances mechanical strength

- Compatible with Latch and Micro Latch MPO

MPO^{PLUS}

SC-Footprint Adapter

Patented one piece design adapter in a compact SC-Footprint package

External Shutter

- INTERNAL and External shutter ready design

MPO^{PLUS}

Stackable adapter

Stack vertically or horizontally, as many as you need

- Super high density application
- Standard and angle versions are available

MPO^{PLUS}

Metal Adapter

Metal one piece adapter design

- Various mounting flange available
- Internal metal shutter ready design

MPO^{PLUS} Tools

The Improved MPO Connector

**PRECISE
ALIGNMENT**

FEATURES

- 12 Fiber SM low loss, and 12 Fiber MM low loss gives industries lowest insertion loss of a Max 0.25dB and a typical of lower than 0.1dB
- Removable housing
- Metal pin holder
- Oval spring
- 20N spring for 24F MM ferrule
- Spring push with slit for easier assembly
- Flex angle boot and other boot styles

The MPO Plus connector offers up to 32 times the density of standard connectors, providing significant space and cost savings. MPO Plus Connectors utilize precision molded MT Ferrules, with metal guide pins and precise housing dimensions to ensure fiber alignment when mating. MPO Plus Connector housing are available in Green (for SM), Yellow (for SM Super Low loss), Beige (for MM) and Aqua (for OM3 Fiber). Ferrule available in 4, 8, 12, 16, 24 and 32 fiber hole configuration. Ferrules are available for SM Standard, SM Super Low Loss, MM Standard and MM Super Low Loss. Boots are available for Ribbon Cable, Ribbon fiber, Round boot and the patent SENKO Flex angle boot.

MPO Plus Mini, ready for 40/100G Ethernet Migration

Unlike traditional 10GbE transmission which utilizes a 2-fiber configuration, the 40GbE and 100GbE are implemented over multi fiber array MPO connectors. It is critical that proper connector orientations are established. The TIA 568 standard provides three methods for configuring systems to ensure that proper connections are made.

Each MPO connector has a key on one side of the connector body. The "Key Up" position refers to the orientation where the key is located at the top position of the connector. When looking at the end face of the connector, position 1 is on the far left while position 12 is on the far right. Depending on the adopted connectivity orientation, the MPO adapter needs to be suitable for its application, which is either "Key Up to Key Down" or "Key Up to Key Up". In addition, MPO connectors are differentiated to a Male and Female connector. A Male MPO connector has two alignment pins while a Female MPO connector has two alignment holes where the pins are to be inserted when a connection is made. An MPO connection can only be performed between a Male and Female connector to ensure proper alignment which is required to maintain a low loss connection. SENKO's MPO Plus MINI Connector allows end users to freely change Polarity or Gender in the field, which gives great flexibility in network configuration.

MPO^{PLUS}

Bayonet Connector

The Smallest MPO Connector in the world

*Works with
conventional
MPO Adapter*

Plug in Connector and turn
Bayonet **clockwise** to
ENGAGE

To remove Connector turn
Bayonet **counter clockwise** to
DISENGAGE

FEATURES

- SENKO patented design
- Smallest housed MPO Connector with a total length of 18.5mm for Ribbon Fiber
- Works with existing conventional MPO adapters.
- SM, SM Super low loss, MM, MM Super low loss type available
- Ribbon Fiber, Ribbon Cable, various boots available
- Spring loaded free floating ferrule
- Integrates other MPO Plus benefits such as low loss ferrule, chamfered metal guide pin, oval spring & ferrule free floating

Solution where space is a matter

The 17.25mm total length MPO Bayonet MPO Connector, make a ideal solution for usage where space is a limited. Works with all conventional MPO Adapters, and the spring loaded free floating ferrule allows the optical connection in all times.

Color available in Green, Yellow, Aqua, Beige and more.

- Minimizes box size requirement for outdoor application
- Same footprint with various fiber configuration
- Patented Safe Lock Ring feature
- Optimized for aerial application

Empowering the Internet Of Things

SENKO introduces its new IP-ONE hybrid connector, combining Power & Fiber in ONE, specifically designed to meet the demands of the Communications Market.

SENKO's IP-ONE is a cost effective hybrid connector designed for harsh environmental applications, providing power and optical connectivity together to any remote equipment. SENKO IP-ONE reduces material cost, simplifies installation and has found applications in Front-haul, Backhaul, DAS and FTTX deployments. It's the connector of choice for anywhere that requires both power and fiber remotely.

High quality material for trusted reliability

SENKO's MT Ferrule, made from high quality glass filled PolyPhenylene Sulfide (PPS) is used with our MPO Plus Connectors and tested against the stringent requirement of Telcordia's GR-1435. Glass filled PPS is ideal for precise tolerance molded components because it has minimal water absorption and has a very low coefficient of linear thermal expansion. As such, the ferrule offers excellent performance and properties for all environments.

Ultra precision molding for uncompromised performance

With the recent advancement to precision molding technology, SENKO ferrules are manufactured with much tighter specification as compared to conventional products. With these ultra-precise dimensions, SENKO is able to achieve the lowest industry insertion loss of 0.25dB guaranteed with a typical IL of greater than 0.1dB for the SM and MM Low loss ferrule. SENKO's Low Loss ferrules are made to meet the new IEC 61755-3-31 Grade B requirements.

Ultra precision machined metal guide pin

SENKO's innovative chamfered MT Guide pin design together with its improved spring are key to confidently align 2 MT Ferrules and provide a reliable fiber to fiber mating anytime, every time. SENKO's MPO Plus chamfered stainless steel guide pins are manufactured to the tightest specification having a tolerance of $\pm 0.1\mu\text{m}$ for the SM Super low loss guide pin, allowing a super precision alignment of the ferrule. Guide pins are available for SM Grade, SM Super Low Loss grade MM Grade and MM Super Low Loss grade.

MPO^{PLUS} Specialty ferrules and guide pins

SENKO designs and manufactures specialty MT Ferrules and Guide Pins for a variety of applications. Versions up to 48 fibers with various dimensions are achievable. Please contact the SENKO sales team for further information.

FEATURES

- Special MT ferrule having higher fiber count
- Special MT ferrule having different dimension
- Thin MT Ferrule, Short MT Ferrule
- Special Guide pin and Pin holder

MPO^{PLUS} MT Ferrule

12 Fiber Ferrule

SENKO's MPO Plus MT 12 fiber ferrule are the most common used MT Ferrule in the market which gives the best combination of easy-to-use and low insertion loss. The SM Low Loss and MM Low Loss now guarantees the industry's lowest insertion loss of 0.25dB, with a typical of greater than 0.1dB, which exceeds the IEC 61755-3-31 Grade B Requirement. Quality, Price, durability and ease of assembly makes the 12 fiber your best choice.

SPECIFICATION	SM LOW LOSS	SM STANDARD	MM LOW LOSS	MM STANDARD
IL Typical vs Reference connector	0.10dB	0.20dB	0.08dB	0.15dB
IL Max vs Reference connector	0.25dB	0.70dB	0.25dB	0.50dB

12 Fiber Super Low Loss**
Insertion loss distribution
MAX IL 0.25dB

** Above insertion loss and return loss are only achievable when proper polishing is made tested by SENKO's recommended process

MPO^{PLUS} MT Ferrule

24 Fiber Ferrule

SENKO's MPO Plus 24 fiber MT Ferrule consists of 2 rows of 12 high precision fiber holes, yielding a high density connection with industry leading insertion loss values. Versions available in SM, MM and Low Loss MM make it the ideal choice for super high density connections and high speed 100G and 400G parallel optics platforms. SM 24 and MM 24 fiber are to be used with a 20N High force spring.

SPECIFICATION	SM	MM LOW LOSS	MM
IL Typical vs Reference Connector	0.25dB	0.15dB	0.20dB
IL Max vs Reference Connector	1.00dB	0.35dB	0.50dB

MAX IL 1.00dB

** SM 24 and MM 24 fiber are to be used with a 20N High force spring

MPO^{PLUS} MT Ferrule

16 and 32 Fiber Ferrule

SENKO's MPO Plus MT 16 and 32 fiber ferrules are designed to meet TIA 604-18 standard which addresses 16 fiber hole width MPO requirements and are available in single row 16 fiber and 2x16 row 32 fiber configurations. Industry leading 16F SM Low Loss ferrules meet the most demanding insertion loss and return loss requirements for high speed 100G, 400G and beyond parallel optical networks.

SPECIFICATION	16F SM LOW LOSS	16F MM LOW LOSS	16F MM	32F MM
IL Typical vs Reference Connector	0.15dB	0.15dB	0.20dB	0.25dB
IL Max vs Reference Connector	0.35dB	0.35dB	0.60dB	0.60dB
Random Mating Grade IEC 61755-3-31	0.Grade B*	n/a	n/a	n/a
Return Loss	60dB	25dB	25dB	25dB
Recommended PIN Used	SM Low Loss Pin	SM Pin	MM Pin	MM Pin

FEATURES

- One row of 16 fiber or 2 row of 16 fiber (= 32 Fiber)
- New Pin to Pin width of 5.3mm
- New pin OD Spec of 0.55mm
- New MT specification being standardized by TIA 604-1 (FOCIS 18) and IEC (61754-7-3)

* Meets the current IEC Grade B performance requirement for 12F MT ferrule. The grade specification for 16F MT is underdevelopment in IEC

**Above number is only achievable when using SENKO recommended reference jumper, pPolishing process and testing method

Senko SM 16F Low Loss
Random Mating Test Result

Senko has a complete line of products to help you with getting the optimal performance from your MPO connectivity. Senko has *Try Before You Buy* demo units available so that can do a risk free evolution for deciding if our products will meet your needs. We also offer product training that can be tailored to your requirements as well as full technical support.

SUMIX MAX Quantum Interferometer

P/N MAX-QUANTUM

FEATURES

- Measures single fiber connectors in 1.4 second and MT connectors as quickly as 7 seconds
- Measures radius of curvature, apex offset, fiber height, core dip and other surface details as small as 1.47 μm
- Overcome cable tension and ferrule positioning uncertainties in with MPO measurement and control additional parameters for guide holes parallelism and angles

SUMIX Manta W+ Inspection Scope

P/N MNT-W-STAND

- Extremely fast inspection taking 2 seconds to check a standard MPO connector (12 or 16 fibers)
- Detailed high-resolution picture with 1.8 μm resolution and 0.75 μm defect size detection capability
- Large field of view (4.1 \times 3.0 mm) and able to see beyond the guide pins and guide pin holes

End Face Metrology & Polarity Management

SUMIX Polaris Benchtop Microscope

P/N POLARIS

Designed for critical examination of the polished fiber end faces and may serve as a reference system to verify and adjust lower resolution microscopes on the production line.

- Check your defects as small as 0.2 μm in diameter and scratches as small as 0.4 μm in width
- Fully automated movement along MPO connector endface automatic tracking of the fibers in numerical order

SUMIX Manta W+ MPO Polarity Verification Module

P/N MPO-VERIFIER

- Supports 12/24/48-fiber and 16/32-fiber MPO, both male and female types, MM and SM
- Non-contact scan (*MPO fibers and pins remain intact*)
- Automated test and analysis

SMART CHECKER MPO Polarity & Continuity Tester

P/N AFT-FC-MPO-02

- Tests 8 and 12 MPO unpinned assemblies for Method A, B and C polarity in 1 sec
- 5 hour battery makes this ideal for bench top and field applications
- Kit options available for checking 24F MPO, MPO cassette modules and MPO loop back assemblies for polarity verification of installed MPO based link

Smart Probe^{II} WIFI Inspection Scope

P/N SCK-VM3000-01

SENKO Vue 3 App

- Visual Inspect of the individual fibers in the array in the field and labs setting for contamination and surface defects
- WIFI interconnects to iOS and Android compatible devices and USB connector to Windows OS devices
- Inspection tips available for MPO and Senko's MT based IP Series connector systems

End Face Cleaning *Click Style Cleaners*

Senko's Optical Connector Lineup creates reliability in telecommunications service

The cause of numerous problems in optical communication equipment is contamination of the end face of optical connectors. Senko has developed optical fiber cleaners with fiber specifically for optical connectors to help create a reliable telecommunications service. Senko's optical connector cleaners eliminate even the smallest contaminants that are visible only through magnification.

Why is cleaning optical connectors so important?

Contamination of the optical connector end face can easily occur. The transmission quality will be affected once the contaminants adhere to the 10µm diameter optical fiber core, and there is increased danger that the fiber end face will be damaged by any high powered light. Cleaning the optical connector end face is extremely important before making a connection.

Smart CleanerTM MPO Series

P/N SCK-SS-MPO & SCK-SS-MPO-02

The Smart Cleaner is a dry cloth cleaner specifically designed to clean connections residing in an adapter, faceplate or bulkhead.

- Cleans 600 end faces
- Cleans in adapter and unmated MPO endfaces
- Centered key tip for 12, 24 and 48 MPO and offset key for 16 and 32 MPO

OPTRES Gel Pad Cleaner

P/N SCK-PT-MPO-01

Conventional Cleaner VS NEW Gel Pad

Particles around the pin area can remain which could cause "air gap"

Full surface of the end face will be cleaned

- Uses zero residue gel trapping surface dust
- Simple tough and go cleaning process
- Can be use for cleaning lensed array ferrules

End Face Cleaning *Cassette Cleaners & Gel Pads*

Smart CleanerTM Cassette Series

P/N SCK-CC-100 & SCK-CC-200

400+
CLEANINGS

- Economy cassette for cleaning up to 400 MPO end faces
- Manual advance cleaning ribbon and compact housing for good ergonomics in the operator's hand
- SCK-CC-100 for unpinned MPO and single fiber end faces
- SCK-CC-200 modified window for cleaning 12 and 16 pinned MPO end faces

OPTIPOP R Cassette Series

P/N CRE-01, CRE-03 + CRC-RS-0

400+
CLEANINGS

- 400 cleanings per cassette and refillable
- CRE-01 for unpinned MPO and single fiber end faces
- CRE-03 modified window for cleaning 12 and 16 pinned MPO end faces
- CRC-RS-01 refill six packs
