OTIPOP R CASSETTE

How To Change the Refills in the OPTIPOP R Cassette

- 1 Use a flat head screw driver to loosen housing screw and pull side tab to open cassette housing.
 - 2 Remove the old Pay Off spool and the Take Up spool.
 - 3 Insert attach cleaning ribbon from new spool to the Take Up spool and route the cleaning ribbon using the diagram.
- Make sure the cleaning ribbon is underneath the shutter & cardboard insert and above the blue rubber backing pad.
- 4 Close cassette housing and reattach the housing screw.

RECOMMENDATIONS FOR GETTING OPTIMAL CLEANING

- **Only pull the trigger once to get a new section of cleaning ribbon.** The gear system of the OPTIPOP R Cassettes is designed to advance enough of the cleaning ribbon to get a completely new section into the cleaning window with a single engagement.
- **Do not try to reuse the cleaning ribbon.** Contamination removed from the first use of cleaning ribbon will be reapplied if an operator tries to flip over and reload the old cleaning back into the cassette.
- **If a wet-dry cleaning is needed, apply a small drop the cleaning fluid onto the cleaning ribbon.** Always start by putting the ferrule into the wet area on the ribbon and wiping towards the opposite side of cleaning window to finish in the dry section.
