

SN® GANG-CLIPS

Quad and Duplex Design for QSFP-DD, OSFP and SFP-DD Transceivers

SENKO's SN® Gang-clips are designed to hold four individual SN® connectors side by side so they can be plugged into either 4-channel QSFP-DD, OSFP or 2-channel SFP-DD transceivers simultaneously. This speeds up the patching time and simplifies the process of patching multiple connectors - it also allows the four duplex connectors to act as a single Base-4 or Base-8 connector.

The Gang-clip is generally deployed in transceiver breakout applications where, for example, a single 400G transceiver is broken out to 4 x 100G transceivers within spine-leaf architectures. The Quad Gang-clip is also compatible with non-shuttered SN® adapters that share the same footprint as QSFP-DD and OSFP transceivers.

FEATURES

- Allows multiple SN® connectors to be patched simultaneously
- The compact design prevents interference with transceiver pull-tab
- Suitable for QSFP-DD, OSFP and SFP-DD transceivers

APPLICATIONS

- Transceiver breakout applications
- Spine-leaf architectures
- Enterprise data centers
- Patching to standard SN® non-shuttered adapters

KEY BENEFITS

- ✓ Patch 4 x SN® simultaneously to QSFP-DD and OSFP
- ✓ Patch 2 x SN® simultaneously to SFP-DD

ORDERING

Metal Quad Gang-Clip

Metal Duplex Gang-Clip

PART NUMBER

602-CLIP-QD-01	Metal Quad Gang-clip for QSFP-DD and OSFP Transceiver Types (Standard SN Connectors Only)
602-CLIP-DX-02	Metal Duplex Gang-clip for SFP-DD Transceiver Types (Standard SN Connectors Only)

PART NUMBER

6A5-CLIP-QD-01	Metal Quad Gang-clip for QSFP-DD and OSFP Transceivers (SN EZ-Flip Connectors Only)
6A5-CLIP-DX-01	Metal Duplex Gang-clip for SFP-DD Transceivers (SN EZ-Flip Connectors Only)

602-CLIP-DX-02 ORDER CODE example
