

# SMART OPTICAL 4X4 WIPES

Part Number: **AFT-G-NW**

Optical grade wipers for cleaning optics

**SENKO ADVANCED COMPONENTS** optical grade wipers are ideal for cleaning bare fibers and ribbon for terminations and fusion splicing. The wipers are soft and absorbent making them ideal for cleaning ceramic and composite ferrule end faces.

- Lint free optical grade wipers.
- 4" x 4" (102mm x 102mm) square wipers.
- 100 wipers in resealable bag.
- Cleans fibers and connector end faces.

## TYPICAL APPLICATIONS

Field Installations

Data Centers

Central Office

FTTH Networks

FTTA Networks

Medical

R&D Centers

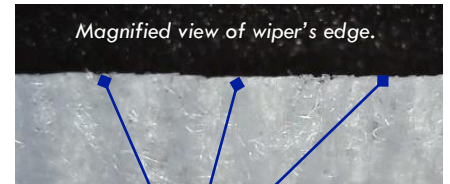

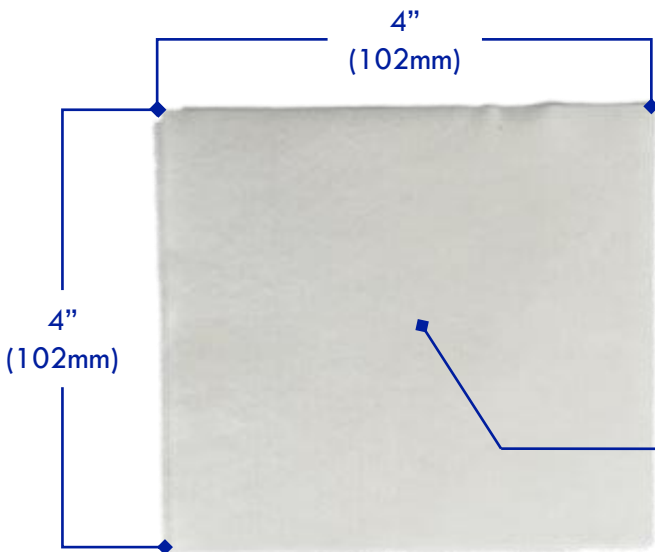

MIL-Aerospace

## KEY FEATURES

- 4"x4" (102mm x 102mm) wipers are ideal size for use in the field during installations and for use on production lines.
- Highly absorbent with high absorbency for wiping away residues and dust particulates.
- Wipers packaged in Class 100 cleanroom in a resealable zip lock bag to protect wipers pristine.

Length:	4" (102mm)	Width:	4" (102mm)
Count:	100 wipers/bag	Weight:	75g

Precision slitting prevents lint generation.

Nonwoven polyester-cellulose composition makes a soft, high absorbent wiper with high strength.
